

Bid #20-02

Automated Camera and Production Sports System, Tournament Sportsplex

Questions Regarding the Scope of Work

- 1) The scope states that score graphics sync with each field's scoreboard. Does each field have a scoreboard of its own? **We only have 1 field that currently has a scoreboard. It is Field #1 (Championship Field)**
- 2) What type of scoreboard is on each field? **Nevco**
- 3) Is there an existing hard-wired internet Demarc to connect the system to? **Yes, in the data room on the Southwest corner of the main building.**
- 4) Is there 80Mbps upload bandwidth available? **Yes we have plenty of bandwidth**
- 5) Is the Tampa Sportsplex OTT web page already created? Or will this page need to be developed and created from scratch? **This page will need to be created. We would ultimately like to have it incorporated into our existing website.**
- 6) What method of installing electrical and/or data to the camera locations on the field is required? Trenching or boring? No preference? **Depending on the location there would be a preference. I would say that if we can keep everything to the corridors then trenching would be method to utilize. Please describe how the electrical and data would be installed, with or without conduit, depth etc.**
- 7) Does the Tampa Sports Authority understand that there will be ongoing yearly costs associated with the system such as streaming hour fees? **Please provide detailed information on any additional yearly costs. Detail if its automatic reoccurring or by usage etc.**
